

THE GLEICHEN CALL

VOLUME XXIX NO 41

GLEICHEN, ALBERTA, WEDNESDAY DECEMBER 23, 1936 SUBSCRIPTION \$2.00 PER YEAR

GLEICHEN HOTEL TO CLOSE DOORS FIRST OF YEAR

News that the Gleichen Hotel would close on December 31st caused some concern and surprise to the townspeople. The Gleichen Hotel had been opened for nine years and the closing of it is based on the fact that a town must have a population of 500 before it can have two beer parlors. Evidently the law does not take into consideration the length of time a hotel has been in operation and that during the past few years all towns have declined in population, with few exceptions. In the case of Gleichen the population has increased by more than a score since the Dominion census was taken.

With the closing of the hotel and the sale of fixtures means that Joe Guttmann the proprietor and a like-able fellow, will be moving away. Joe is the greatest optimist Gleichen ever had. He has been president of the Athletic Club ever since it was organized and while in that position saw the present arena erected, and dressing rooms at the swimming pool installed. Year by year had high hopes of getting a roof on the rink but the depression, poor crops, half-starved and other obstacles halted the like. Mr. Guttmann always says "no donor, no assistance" was asked of him as he always helped out to the best of his ability. He ran an excellent hotel and none were ever able to find fault with his management. Yes, we are sorry to see the Gleichen Hotel close and Joe seek his fortune elsewhere.

THE WORLD OF WHEAT

Scientific research is truly the life-blood of agriculture.

The human blood stream courses through our bodies conveying to cell in every part the precious elements needed for life and growth. The same blood stream, in its flow, also removes worn out and harmful substances.

Scientific research likewise courses through the agricultural body, conveying to farmers new products, new ideas and methods; showing products also how to remove those things which are harmful and wasteful in their farming operations.

Agricultural research affects three groups of people—first the farmers who benefit and for them the work is done, second the government which allocates the money, and third the tax payers who pay the bills. The cost falls mainly upon the people of Eastern Canada, for they pay the greatest part of our Dominion taxes. (This however, might be considered as a small offset to the advantage Eastern Canada enjoys over the west because of Dominion tariffs.)

Western agriculture now badly needs more and more of this valuable work, but to expand it our agricultural institutions need more funds.

Western farmers could, therefore, help themselves if they would instruct their members of parliament to request the government to allocate additional money for agricultural research.

As agricultural research advances, so unquestionably will the welfare of farmers increase.

Following factors have tended to raise prices: Reports that Germany will purchase 37 million bushels—Egyptian cotton production far larger than last year—Germany concludes agreement with Danubian countries to exchange German goods for pork and lard—China permits free movement of foodstuffs between its provinces—Authorities consider some shortage of feeding grains in Europe.

Following factors have tended to lower prices: Official estimates—Argentina crop approximately 250 million—Formosa rice crop largest on record permitting about 24 million bushels for export—Danubian countries expect to export wheat more actively in New Year—Expect many countries will increase acreage—India shipping steadily wheat, barley and grain (pea feed).

SNOW REMOVAL PROGRAM MEANS LOT TO PROVINCE

Welcome news to the motoring public of Alberta, to farmers and

Season's Greetings

"Christmas, the season of hospitality, merriment, and open heartedness is here again; the old year is preparing like an ancient philosopher to call his friends, and amidst the sound of feasting and revelry to pass gently and calmly away. And numerous indeed are the hearts to which Christmas brings a brief season of happiness and enjoyment. How many families whose members have been dispersed and scattered, far and wide, in the restless struggles of life, are then reunited, and meet once again in that happy state of companionship and mutual goodwill which is a source of such pure and unalloyed delight, and one so incompatible with the cares of the world."—Charles Dickens.

And so The Call pauses for an interlude to endorse the sentiments associated with this season of the year expressed by Charles Dickens, and to wish for every one A Happy, Happy Christmas and Prosperity in the New Year.

ATHLETIC CLUB SET HOURS FOR SKATING

Final arrangements for the operation of the rink were made by the skating rink of the Athletic Club in Jaffe's Coffee Shop. Free skating will be offered everyone on Sundays while other public skating will take place from 8 to 10 every evening with the exception of the nights when hockey games are scheduled. The fees remain the same as during the past season. A Pee Wee league has been formed and a practise hour has been set from 7 to 8 on any night the skaters play away from home, also Saturday mornings.

It was with deep regret that the president of Mr. Joe Guttmann, president of the Athletic Club since its inception, was received.

A complete program of co-operation between the Athletic Club and the Jumbers was drawn up, it being more fully recognized that the use of both clubs should be linked together. A membership card for the Athletic Club is being arranged previous to holding the annual meeting, which is scheduled to be held early in the New Year.

Final arrangements were made with regard to the care-taking during the ensuing season and a number of outstanding accounts were ordered paid.

ST. ANDREW'S CHURCH

Christmas services will be held in St. Andrew's Church on Sunday December 27th at 11 a.m. Holy Communion will be administered at this service.

Rev. Mr. Willey wishes to express his regret regarding the misunderstanding of last Sunday's service. He will be here for service on December 27th for sure.

REV. C. W. WILEY, M.A.
(incumbent)

Others is found in the announcement that the provincial government intends to greatly increase its highway snow clearing program this winter. The intention is to operate snow plows on 1,800 miles of Alberta highways, compared with 1,200 miles covered in last winter's program. Through the purchase of three new four-ton trucks for snow removal purposes the Department of Public Works will be enabled to extend its program. These trucks have improved apparatus which, it is believed, will make it possible to cover a greater mileage than hitherto, the plow points in particular being one of the improvements. Three old snow plows were turned into the factory by the Public Works Department under the deal by which the new equipment was acquired.

The snow clearing program comprises 443 miles of highways in the Calgary district, 496 in the Edmonton area, 359 miles in southern Alberta to be covered from headquarters at Macleod, and 382 miles in what is described as the Red Deer area.

Need of extending the snow clearing program, particularly in the interests of motoring and also to serve the motoring requirements of farmers has been urged by the Alberta Motor Association. They have also taken up the question of the wide bench sleighs, so that shovels and cars would both be enabled to operate over the roads in winter.

DUST STORMS THE CAUSE OF SOME MISERY

Friday afternoon the worst dust storm this year struck the town and district, and when it was over the housewives had a man sized job on their hands. Shortly after the storm sprang up the electric power failed and did not come again until after 8 o'clock. Meantime, tumbling mustard, dust, sand, gravel, odd boards, cans, roofing material and other articles sailed majestically down the streets until stopped by some object. The dust did not stop. It went right into every home and was finally cleaned in anticipation of Xmas and settled everywhere in a heavy mantle. As there were no electric lights and most of the homes were lighted by candles or lamps no one noticed the dust coming in. When the lights finally came on the ladies realized the work that lay ahead of them.

The storm caused the cancelling of two hockey games; one for the Gunners with Calgary team Friday night and a Pee Wee fixture Saturday morning. The ice was blanketed with dust.

In the country some of the farmers state dust was so heavy they were unable to see five feet, consequently could not do their chores. There was no doubt the farmers got the full force of the moving real estate. There was some damage in town. Open doors were ripped of their hinges, an odd storm window that had not been securely fastened crashed. On the main street tumbling mustard piled up by the hay rack load against parked cars. When the cars were moved away the weeds bounded with the wind to an unknown destination.

HOCKEY EXECUTIVE ENDEAVOR TO FORM LEAGUE

A special meeting of the executive of the Gleichen Gunners Hockey Club was held with a view to determining the method to be followed by the Club this winter. It was decided that an endeavor would be made to link up at least three local teams in a league and the possibility was entertained that these clubs would be the Brooks, Arrowood and Gleichen.

Application will be made to the A.A. A. to have this League formed.

If this effort should prove unsuccessful that the Club be allowed to enter the Morgan Cup play-offs. This would place the Gunners in the same position as a league winner would be. Some thought was also given to the possibility of two Calgary intermediate clubs forming a league with Gleichen for the same purpose.

The executive officer will have to be left in charge for a short time since both Brooks and Arrowood as well as the Riverdale Red Wings had not affiliated at the date of this meeting.

The question of entering the Bow Valley League was dismissed as being impossible financially.

The Victoria Club was also considered as a possible member of a local league but the meeting was advised that this club had joined the Foothills League and would, therefore, not be available.

STORES TO OBSERVE BOXING DAY AS A HOLIDAY

The public of Gleichen and district are advised to stock up sufficiently to observe the long holiday from Thursday night, December 24th until Monday morning December 26th as the merchants have agreed to observe the holiday. Stores will remain open until a late hour on Thursday, preceding Christmas for the convenience of customers. Alberta generally will observe Boxing Day as a holiday, enabling legislation having been introduced in the form of an amendment to the interpretation act at the regular session of the legislature last winter. Some holidays, such as Christmas, New Year's, Thanksgiving, Empire Day and Labor Day are observed as completely as possible, while other such as Remembrance Day, are only partially observed. The desire to commemorate Boxing Day has been growing in the past few years, and the amendment to the act was a reflection of this feeling.

The United Church Sunday School held their Xmas Tree and supper Monday evening with a large attendance. There was an excellent program presented after which Santa Claus arrived on the scene much to the delight of the little people. Books and Bibles were presented to the scholars. Among those who had a perfect attendance for the past year and received Bibles were Janet Murray, Betty Kelly, Donald Farquharson, Edgar Taylor and Campbell Evans. Miss Betty Kelly holds a record for attendance over a period of years. She has not missed a Sunday in seven years.

Peter Windsor who has been attending the university at Edmonton arrived home for the holiday season.

FROM THE FILES OF GLEICHEN CALL TWENTY YEARS AGO

F. Willian had a wonderful escape from death last evening. He was driving toward town in his auto when he met what appeared to be a team of horses and a colt. The team kept the road so well that he had no reason to believe they were not driven by some person, when really they were run aways. When within a few feet they gave a jump and the next instant the car was in between two horses. The car was badly smashed and Mr. Willian was shaken up and bruised.

The fire brigade held a meeting in W. H. James' store. Harry Brown who was appointed chief was in the chair. The following officers were elected: asst. chief, A. Reid; capt. No. 1 engine, E. White; asst. No. 1 engine, R. Jens; capt. No. 2 engine E. Gobel; asst. No. 2; Simon; nozzles, E. Tadpole and C. Gaudier; couplings, D. Ramsbottom and G. Hetching; hydrant, P. MacLean; sprayer, J. A. Ranshaw; secretary-treasurer, F. L. Mallory. Chief Brown was instructed to make an inspection of all stove pipes in town and see that inflammable refuse was removed the rear of all buildings.

Saturday night about 10 o'clock the barn and contents of Robert Burrow's was totally destroyed by fire, including three work houses, two cold storage houses and a cow house. The barn was owned by Miss Ada Burns.

W. F. Durston of Queenston offered a turkey to be sold at auction in aid of the patriotic fund. The first man buying it for \$4.50, put it up again and a lady got it only to offer it again. Numerous times it was offered and was finally disposed of at \$5.50. The total receipts for the turkey were a little over \$47—some turkeys.

The Bow river is now fairly well frozen over and will be quite safe to cross in a few days provided the weather does not become mild again, which grain haulers hope will not occur. At the coal mines the Indians are crossing with loads for Cluny, but at the Cluny ferry only auto and light rigs are crossing, most farmers preferring the longer but safe route by the bridge.

D. B. McNeil of Vancouver spent last Thursday visiting his old friends in Gleichen.

Our Red brothers have certainly had the time of their lives the past week

About the Neighbours

Somebody once said it takes all kinds of people to make a world. Most of us agree they are all here. You may like all your neighbours and you may not. The point is, if not, WHY not?

Would you remain friendly with the man who told you one thing one day and the opposite the next? Would you prefer a neighbour who always lived up to his promises, to one who promised one thing one day and did something entirely different the next?

Would you lend your closest neighbour your binder or wagon if you had no reason to suppose he would ever return it? Or would you lend him your cold chisel if you knew he would tell all his friends you were the most unreasonable and most greedy person alive?

Do you think for a minute your community would be made more harmonious, a better place in which to live if everybody did the best they could, were as fair in their dealings with each other as you would have your neighbour be with you?

Is it not a marvelous feeling to know you can trust your neighbour? Is there any excuse your neighbour can possibly make that would pardon him in your own mind for suddenly disregarding all agreements or promises he ever made to you?

This statement is one of a series written by The Mortgage Loans Association of Alberta, of Edmonton. The Association is composed of 44 member companies representing hundreds of small investors in typical Canadian business. It is designed to citizens of Alberta amount to some forty-five million dollars.

(The fifth statement in this series will be published in two weeks)

HAROLD LLOYD

in THE MILKY WAY

He could whip his weight in cream!

The story of a timid milkman who made the mistake of kayaking the world's champion prize-fighter and falling in love with a cute little dame all at the same time.

GLEICHEN COMMUNITY HALL

spending \$92,000 and they are doing it yet. But the Blackfeet Indians are not spending all their money as recklessly as some might imagine. True, they have their amusements, such as dancing, racing, etc. and buy candy, fruit, cake, and toys in large quantities, and sometimes extracts and perfumes. But they also buy all kinds of useful articles, quite a collection for a family, value up to \$135. They are not softies people. We saw an Indian who had \$1,800 from his farm, count out a whole handful of \$5 bills for his square. Then two boys and a girl were given several bills each and finally a pauper on its mother's back clapped a one dollar bill. Smiling the happy family made off for the nearest store.

Mr and Mrs W. Erford and boy left on Tuesday morning to visit friends in the east. Mr. Erford dearly loves a joke, so we must not miss one at his expense, more so now he is at a safe distance. On Sunday he brought his family in from the farm and put up at the Palace Hotel to catch the train a "unearthly hour" of 4 o'clock Monday morning. They reached the depot at the "unearthly hour" and the train arrived—so did a friend.

The train was natural, but the train pulled away while it was still in progress. Twenty-four hours later the "unearthly hour" saw all aboard—the Erford family included.

Helps END A COLD Quicker

The 3-Minute VapoRub Massage

Massage VapoRub briskly on the throat, chest and back (between and below the shoulder blades). Then spread it thick over the chest and cover with warm cloth.

Almost before you finish rubbing, VapoRub starts to bring relief two ways at once—two direct ways:

1. **Through the Skin.** VapoRub acts direct through the skin as a powerful irritant.

2. **Misted Vapors.** At the same time, its medicinal vapors, released by body heat, are breathed in for hours—about 18 times a minute—direct to the irritated air-passages of the nose, throat and chest.

This local poultice-and-vapour treatment combats the cold—relieves irritation—helps brain congestion. While the little patient relaxes into comfortable sleep, VapoRub keeps right on working. Often, by morning the worst of the cold is over.

Avoids Risk of Stomach Upsets

This soft, external treatment cannot possibly upset the stomach, as constant internal "dosing" is so apt to do. It can be used freely, as often as needed, even on the youngest child.

Now White—Stainless

Thanks to a new process, VapoRub now comes to you in white stainless form. Only the color is removed; it is the same VapoRub—the same formula and the same effective double action.

VICKS VAPORUB

Mother! Look in your VapoRub package for full details of Vicks VapoRub—its special qualities, its greater freedom from colds. In clinic tests among (7,353) cases, this plan can't be beaten. See your druggist. Follow Vicks Plan for Better Control of Colds

Community Hospitalization

During the past three or four years public demand for some form of State hospitalization and medical care or insurance against the great burden of the cost of sickness to the individual has accelerated materially in the three prairie provinces and it has now become an accepted fact that it is only a matter of time before these costs will become a community affair, at least on a province wide scale and perhaps eventually throughout the Dominion.

Many scattered communities have already adopted the principle on a limited basis by the appointment of a part or whole time municipal doctor and by making agreements with hospitals, providing for the medical and hospital care of those in the community, the members of the community of the subscribing community. In some instances outstanding success can be attributed to these limited ventures, but in other cases it is felt that financial ability has restricted the scope of the work in channels too confined; but even in these cases, the appetite for a wider system has been created resulting in a growing demand for adoption of a plan which will cover the entire range of care for sickness and one which will spread the costs over a greater number of people.

As a result of this accumulating public demand, the question of some form of group health insurance has of late been occupying the attention of the governments of the three prairie provinces and some progress towards the consummation of plans has been made in varying degree. A good deal of spade work has been done, both by governments and other organizations.

One of the chief difficulties confronting the prairie provinces in launching any large scale plan of community health insurance, however, is the absence of any data on which to base the probable cost. It is true estimates have been given by public men and others interested in furthering such a project, of the probable cost of operating a scheme of State medicine or a health insurance scheme, but at best they are only estimates and experience in other fields has demonstrated that often enough estimates are wide of the mark when realization is achieved.

It is true that data is available from other countries where health insurance schemes have been operated for some time, but these are effective mainly in industrial countries where conditions are entirely different to those prevailing in sparsely settled agricultural areas like the prairies of the Canadian west and for this reason the figures available elsewhere cannot be relied upon when applied to these areas.

In this connection it is interesting to note that an organization recently set up in Saskatchewan, the Saskatchewan State Hospital and Medical League, with an objective of promoting and establishing a scheme for that province, is going about its work in a business-like manner by securing at first hand a great deal of specific information as to actual costs of a large number of farmers for medical and hospital attention for their families over a five-year period.

This information is being procured by a questionnaire which has been sent out by the League, in co-operation with the Wheat Pool, to the 19,000 Pool members in Saskatchewan and when replies are received it will be possible, by striking an average, to show the actual per capita cost for doctors, hospitalization, nursing services and medicine and medical supplies for a very substantial percentage of the rural population of the province.

While this will not demonstrate the probable per capita cost of a scheme of health insurance on community basis, it will provide a great deal of valuable data and give at least a foundation on which to erect a structure and eliminate the necessity of relying on guess-work from the ground up.

Needless to say it will take some considerable time before all the information available from a questionnaire asking for information on a dozen items is received and compiled, and even then the work of the League will only be well started, but the data will not only be of considerable interest but it will be of great value, not only in formulating a feasible plan for Saskatchewan but also for the neighboring provinces where conditions are somewhat similar.

Keeps War Trophy

Bullet Extracted From Body Of War Veteran After 18 Years

Although he had carried it with him constantly for 18 years, James Varley, Christie Street hospital patient, recently saw for the first time a bullet "presented" to him during the war. At the hospital, Dr. G. M. Dale and Dr. D. E. Robertson removed a German service bullet from Varley's lower spine. Now, according to Dr. Dale, Varley plans to shine the bullet and keep it as a trophy.

The Oldest Ocean

According to some investigators, the Atlantic is the oldest ocean and the Pacific is the oldest of the oceans. Nevertheless, other investigators believe the Atlantic to be the oldest of all the oceans, with the exception of the West Indian region, and that the Pacific is still in the making.

It is said that 54 per cent of the road troubles of motorists is caused by tire and ignition trouble.

It is said that the left hand freezes more rapidly than the right hand.

Firm plum puddings consisted of piglet concoctions, served in soup tureens.

Temperature In Airplanes

Heat Absorbed Reduced By Dry Snow

An artificial snowstorm is being created within the passenger compartments of certain transport planes to overcome the heat absorbed by the plane while on the ground. The temperature can be reduced from 100 degrees to 40 degrees.

This artificial snowstorm is created by spraying basic carbon dioxide on the walls and ceiling of the cabin. This immediately begins to evaporate, resolving itself into a dry snow that leaves no moisture or residue.

New York Times.

It is said that 54 per cent of the road troubles of motorists is caused by tire and ignition trouble.

It is said that the left hand freezes more rapidly than the right hand.

Money may not talk, but it cheers a man up wonderfully.

Reorganize Militia

Canada's Non-Permanent Active Militia To Be Placed On New Basis

Reorganization of Canada's non-permanent active militia has been completed, and as it emerges from the crucible the new form of the Dominion's citizen soldiers is greatly dwarfed in respect of units but durably consistent so far as personnel is concerned.

Hon. Ian Mackenzie, minister of national defence, has released the whole plan involving the reorganization of the non-permanent active forces. These contemplate restriction of units, but are compensated by compactness in efficiency. They also elevate the militia with the prospect to the actual.

In brief, the militia is cut down with respect to paper units. Regiments which previously existed in the militia list only on paper entirely disappeared. Those which persevered strongly in peace times remain, some of them amalgamated with others. It is true, but still with enough preserved in their new name to identify them with their former lustre.

So far as units are concerned, the Mackenzie System is drastic, and has been in process of organization for a year. Reorganization of the non-permanent active forces was the one big problem which confronted the minister when he assumed office last year, and since then the entire department has been working to effect the adjustments announced by Mr. Mackenzie.

The new militia is reduced from 36 cavalry regiments to 20, of which four are permanent car units.

The 135 infantry regiments are whittled to 91. These are made up of 39 rifle battalions, 26 machine gun battalions and six tank battalions.

Artillery is increased by 52 new units. Field artillery batteries will henceforth number 110, an increase of 41; medium batteries are increased from 25 to 31. The heavy batteries remain at present, two, while the coast brigades are unaltered at two. However, anti-aircraft units are increased from one, plus two sections, to six, plus two sections, an increase of five.

The following steps leading up to the reorganization and an analysis of the changes effected were detailed:

Immediately after the war, establishment of the Canadian militia was set up in 11 divisions and four cavalry divisions.

In 1931 an international disarmament conference was summoned to meet at Geneva on Feb. 8, 1932. Canada, faced with the necessity of filing data at this conference, notified the secretariat that in future her land forces would be limited to six divisions, one cavalry division, and certain fortress and ancillary troops.

Although this decision was made by the government in 1931, no instructions to put it into effect were issued up to the time when the present minister took office on October 23, 1935.

On Dec. 4, 1935, a report was laid before the minister, containing a suggested scheme for reorganization. The minister thereupon gave instructions to proceed.

The reorganization is now completed. A few inactive units have been disbanded. Thirty-six cavalry regiments have been reduced to 16 cavalry regiments, and four armored car regiments.

A total of 135 infantry and machine gun battalions have been reduced to 59 rifle battalions, 26 machine gun battalions, and six tank battalions.

By conversion of cavalry and infantry units and by formation of new units, the Royal Canadian Artillery has been increased by 41 field batteries, six medium batteries, and five anti-aircraft batteries.

By conversion of cavalry and infantry units and by formation of new units, the Royal Canadian Artillery has been increased by 41 field batteries, six medium batteries, and five anti-aircraft batteries.

Thou Shalt Not Love

A NOVEL BY —
GEORGE GRAIG

CHAPTER XII—Continued

There were a number of developments the next day. The majority of them quite to be expected.

While Sapphira served her breakfast in bed, considerably surprised and pleased that her charge showed no indications of suffering from a hang-over, though there undoubtedly was something troubling her mind, Starr read the morning papers. There were lurid accounts of last night's party in the tabloids. "Play-Girl" was without any question in the headlines again!

An account, in one of the more gossipy sheets, read:

"Merrymakers at the exclusive Sea Beach Casino last night were treated to an unexpected thrill when Starr Ellsworth, author of the widely notorious book, "Play-Girl" and who is said to have herself furnished the copy thereto, attempted to stage a night swimming party in the god- fountains. On the line of unmitigated it—intervention of Michael Fairbourne, publicity representative for the Tarance Publishing Company, prevented."

Star flung the paper away, sickened. How Michael must have been! There were small comforters in the thought that that was what she had intended to make him think of her.

She could not eat. She felt as if she never wanted to again, but she was making an attempt to get away with her omelet, at the insistence of Sapphira, when the telephone rang. Her heart leaped, then sank down duly. . . . It wouldn't be Michael. It could not be.

It was not. It was Marjorie Brown calling—Marjorie whose bosom was that she was the closest friend "Play-Girl" had (and who was nothing of the sort, since Starr had no women friends at all.) Marjorie was so anxious to give Starr the news she had just heard that she was phoning before she had her morning coffee.

"Start!" her voice rippled gaily. "You'll never believe it, but what do you suppose it happened? Michael Fairbourne and Stephanie Dale are engaged!" Actually, after all the trouble he had getting his parents to consent, —Stephanie called me last night after the party to tell me it happened after Michael took her homes. Isn't that just too thrilling? And won't they make the most gorgeous couple?"

Starr said, in a bored voice: "I hope they will be very happy. Engagements don't interest me, Marjorie—or marriages. So ordinary."

Starr moped around the Egyptian apartment, hating it, hating everything Egyptian once more, and wondering just what her next step would be. With a love affair with Michael finished before it had fairly begun did not mean necessarily that her job as "Play-Girl" was "finished." On the contrary. What "Play-Girl" had done last night had made her better copy than ever. She ought to be valuable to Michael and his publishers. All the joy in playing was gone. She was bored. She was bored now on "playing" who was not as life itself, but if she threw herself into a still madder狂想曲 while she might be able to forget—some things.

The irony of it! She had got into this thing in order to forget how soon she must give up life. Now she had more than ever to forget. Life was certainly increasingly hard.

Shortly before noon a messenger from Cartier's appeared with two armed guards and a package from the famous jewelry firm. Starr gave the messenger her receipt and took the package into the bedroom to open it.

It was a bracelet. A bracelet three inches wide, solidly set with diamonds encasing a row of the most gorgeous fire opals Starr had ever

imagined in her life. The thing must have cost a fortune.

Sapphira's eyes goggled almost out of her head when she saw it.

"For the land, Miss Starr, isn't somebody must be thinkin' a heap of you, chile . . . What's them flashin' kind o' stones that look like rainbows, honey?"

Starr smiled wanly as she answered absentmindedly, fingering Lance Marlowe's card that had come with the gift.

"They're opals, Sapphira — fire opals."

The breath of the colored woman came faintly.

"Opais! Laway, Miss Starr, don't you-all know they say opals can bring the hardest kind o' hard luck? What's he want to send you opais?"

"They can't hurt—me, Sapphira," said Starr, smiling coolly. She was studying Lance's card. On the back he had scribbled:

"I told you these were for you, you lovely thing of fire and ice . . . I

have been very patient, Starr. Are you going to keep me waiting forever?"

She could not pretend to herself that she did not know what he meant. It was plain enough. Lance was forcing her hand. She had stalled with him long enough. Lance was not used to that. She knew—as she realized he meant her to know—that to accept this gift of his meant to become his mistress. Refusing it would terminate their friendship. There could be no more halfway measures.

She held the gorgeous bracelet in her hand, turning it, letting the sun-shine catch in the sparkle of the stones. The diamonds were lovely enough, but those fire opals! Lance must have given her commission to Cartier's to search out the most marvelous stones anywhere to be found. A memory of Michael's words flitted through her mind:

"Lance's favorite indoor sport—buying diamonds!"

Irony of all ironies! This morning Stephanie Dale would be proudly wearing Michael's diamond on the correct finger. But she, Starr, who had dramatically surrendered the man she loved to Stephanie, received a diamond bracelet—symbol of the kept woman!

She was still weighing the situation in her mind when Michael arrived. Starr had not expected to see him, and it is possible it Sapphira had not ushered him into the living room without announcing him, blindly unconscious that he might not be as welcome as always, Starr might have refused to see him. She had intended to tell herself to get back before facing him.

The bracelet was still in her hand as she came through her bedroom door and saw him. Startled, she slipped the glittering thing inside the neck of her frock. She shivered. The stones felt hard and cold against her tender flesh—as icy as the heart in her breast.

There was no friendliness in their greeting. Memories of last night's scandal hung over them rigidly. Michael had come with a definite purpose. His first words staggered her.

His face still wore that tight, intolerable look.

"I've come to release you from your bargain, Starr! It was a mistake from the beginning. No doubt you will be as glad to be relieved of it as I am. This last episode . . . he babbled before the eyes of Lance, in which was the account of last night's party which he had already told, pounding on the objectionable story with an angry finger—"was the finish! It was too much—even for sweet publicity's sake!"

In the face of her dazed silence he plunged on:

"I told Stephanie that the whole thing was a hoax, told her why it was done, and she understands. I hope other people will, too. Anyway, I am ready to shoulder the ridicule, if there is any. Stephanie thinks that it is the best we that—that—"

"That you buy me off?" Starr prompted him crudely. Michael's face went red, but on her was the same tantalizing, dare-deviling "Play-Girl" taunting, disdainful.

Then a spark of resentment flared within her. If he only had not mentioned Stephanie! She blazed out at him:

"Because everything hasn't gone all your own way, you want to get rid of me! I see!" Her taunting, challenging laugh rippled. "Well, suppose I don't choose to be got rid of?"

Michael glowered, said ruthlessly: "I shouldn't think that even you would want to continue in a role that is repugnant to every sense of common decency."

The stirring way he said "even you!" It made her flinch, but he did not see that. He hated her more than she had thought he would, more than

she had thought any man could hate a woman. Now she knew what writers had meant when so often they had declared that there is no passion in the world stronger than love turned to hate.

Her return to him had been sheer bravado. Now the thought came swiftly to her mind: Did she really want to carry on the role of "Play-Girl"? Before when she had thought of it, she had given it slight consideration, taking it as a matter of course that it would continue. Now . . . Well, if she didn't go on with it, what was her alternative for the days that still remained to her?

Her play-life, even though it had ended so tragically, had at least filled the gap of haunted days and nights. It had kept her from drowning too much over her impending doom.

Suddenly, as she visioned going back to empty loneliness and poverty, a deadly fear gripped her. A vision of Mrs. Malone's half bedroom superimposed itself over the beautiful living room with its lovely Egyptian furnishings like a made-up, fade-in on a movie screen. She saw herself sitting on the sagging bed, staring at the drab wall paper, staring, staring.

She could not bear to face it all again. She could have life about her, color, excitement!

But there was an alternative, if she cared to take it. Lance offered a way. Though of course Starr realized that he would be no nearer so enthusiastic if she were a mere nobody and not "Play-Girl" at all. Lance wanted the triumph of making a conquest of the glamorous personality about whom the whole town was talking—the "Play-Girl" who was all fire and ice. And good publicity.

Lance . . . All of a sudden she realized that Lance's bracelet had become red-hot against her breast, as if the fire opals were in reality living flame.

Michael was offering the supreme insult. He was pulling his check book from his pocket, slowly drawing out his fountain pen. His voice was cold, business-like, and he did not look at her.

"How much do you want, Starr, to step out of the picture?"

Now his rudeness was a blazing torch which shook her fragile body savagely. A ragin' young, fire opal young fury snatched the check book from his hand and hurled it into his face, returning fire hate for hate.

"I don't want money from you!" she flamed. "Not a penny! I wouldn't touch it if it were a million! I can get along. I'll show you! I'm going to keep on being 'Play-Girl' and you can't stop me! They'll only laugh at you if you try to deny it—they'll say you're eaten up with jealousy! You've done your ballyhooing too well, Mr. Michael Fairbourne, to try to back out now! You started something! I'll finish it! Now get out of here! Get out!"

The hours that passed after Michael left were so slow and tiring that Starr welcomed it with joy when Lance called up and asked if he might drop in for a few minutes, and did she like her bracelet. She was glad he was here, though as yet she had not the faintest idea what she would 'tell him. All she knew was that anything was better than being alone with her awful thoughts. Anybody.

She was dressed in a cloudy black dress which was not transparent but somehow managed to give that impression when Lance arrived. She wore a startling antique Egyptian headdress bound about her forehead, holding back the little points of her hair that were brushed to a polished ebony. She had cocktails waiting and the lights were mellow in the long, low living room with its seductive cushioned divans and the fire that flickered on the flat hearth. A perfect setting, concocted with the deliberate intention of furthering Lance Marlowe, making him see how really desirable Starr Ellsworth was. She might never go to his arms, but it was just as well to be prepared for that contingency, to keep Lance eagerly wanting her.

Lance wasted little time coming to the point of the real reason for his visit. It was the same old line.

"But I don't see why you're insisting on delaying, Starr," he pressed her, as they lounged over their cocktails. "I can give you everything—if you ever want to write me more now." There was an odd inflection in his laugh—"really I'm conceited enough to imagine I might make good copy."

(To Be Continued)

A man at 40 has no more intelligence than a boy at 14, says a savant. Most any 14-year-old son will admit such in true.

The stirring way he said "even you!" It made her flinch, but he did not see that. He hated her more than she had thought he would, more than

Become Soldiers At Fourteen

Boys In Italy Start Training When They Are Only Six

Tough at 20 some 50,000 Fascist youths, trained in the technique of war, are now passing annually into the regular Italian army.

Most of them have been registered in Fascist Youth organizations for years and the majority have participated actively since their sixth birthday.

At that age they enter the Sons of the Wolf, a branch of the elementary "Balilla," from which they graduate when they are 14 with a fundamental military knowledge qualifying them to train as specialists in Il Duce's legions.

The Balilla's 14-year-old seniors are promoted with symbolic ritual into the next chronologic grade, the Avanguardisti, or Advance Guards, of whom there are about 500,000.

The comparatively care-free training suddenly ceases for these youths who find themselves part of a vast war machine. Their war education is intensified and they are moulded into the pattern of the Italian army.

When an Avanguardista reaches the age of 18 he advances into the topmost ranks of Fascist youth—the Young Fascists of Combat—where his military schooling is specialized.

Then, at 21, he reaches his majority and is eligible to become a Fascist.

Little Helps For This Week

Truly my soul waiteth on God, from Him cometh my salvation Psalm 42:1.

Not so in haste my heart; Have faith in God and wait; Although He linger long, His never comes too late.

The true use of all the imperfections of which you are conscious is neither to justify or condemn them, but to present them before God containing your will to Him and remaining in peace; for peace is the desire of God in whatever state we may be.

You will then easily overcome faults than to choke them by grasping virtues.

Do not think of your faults, still less those of others; in every person who comes near you look for what is good and strong, then honor it and rejoice in it, and your faults will drop off like dead leaves when their time comes.

Search For Lost Radium

Missing From Toronto Hospital, It Is Located In City Dumps

After one of the most intensive searches in Toronto's history in which a radio counter used during the Moose River mine rescue was called into action, \$8,000 worth of radium has been returned to the Toronto General hospital.

The radium capsule was discarded in a dressing and the precious metal was recovered in a city dump buried beneath four feet of ashes.

Officials of the radium department of the hospital called on the Ontario government for aid and obtained the use of a Geiger-Mueller radiation counter used at the Moose River mine to detect the radium in the earth to aid in the search for the lost Toronto men.

The capsule was found in a cloudy black dress which was not transparent but somehow managed to give that impression when Lance arrived. She wore a startling antique Egyptian headdress bound about her forehead, holding back the little points of her hair that were brushed to a polished ebony. She had cocktails waiting and the lights were mellow in the long, low living room with its seductive cushioned divans and the fire that flickered on the flat hearth. A perfect setting, concocted with the deliberate intention of furthering Lance Marlowe, making him see how really desirable Starr Ellsworth was. She might never go to his arms, but it was just as well to be prepared for that contingency, to keep Lance eagerly wanting her.

Lance wasted little time coming to the point of the real reason for his visit. It was the same old line.

"But I don't see why you're insisting on delaying, Starr," he pressed her, as they lounged over their cocktails. "I can give you everything—if you ever want to write me more now."

"There was an odd inflection in his laugh—"really I'm conceited enough to imagine I might make good copy."

Better Things Ahead

Says Sir Chas. Gordon

BANK OF MONTREAL MEETING

Strong expressions of confidence in the outlook in Canada were the keynote of the proceedings at the annual meeting of the Bank of Montreal, held recently at the head office of the Bank in Montreal. The meeting was also informed that the bank was in an extremely strong position, and that its deposits had been further protected by another substantial addition to the reserve fund.

Sir Charles Gordon, president in his address named as the five fundamental features outstanding in Canada's progress during the past year: the recovery in agriculture, the extraordinary increase in mining, the gratifying increase in the tourist trade, and the striking expansion in the building industry.

He dwelt particularly on the mining industry which, according to a recent survey by the bank, would seem to be "the greatest contributor to the federal income tax."

He gave a word of warning regarding provincial legislation in relation to debts, saying in respect to talk of repudiation that he could not see how this line of thought could be pursued without the credit of the whole Dominion coming into disrepute.

Bank's Position Extremely Strong

Presenting the 119th annual balance sheet of the Bank of Montreal, Mr. George W. Bogart, president and Jacob Dodds, his fellow general manager, drew attention to the fact that the total assets of the bank had increased from \$782,800,000 in 1930, up to \$840,100,000 in the present year, and pointed out that the extremely strong position of the bank was reflected in quick assets totaling \$360,000,000, or 43.27% of all liabilities to the public. In informing the meeting of the transfer of \$1,000,000 to a reserve account bringing it up to \$10,000, Mr. Bogart said that this sum was held as a protection for the bank's deposits. "That is to say," he remarked, "we do not hold 100% of our liabilities in cash but in addition to our reserves we have \$36,000,000 of capital and \$39,000,000 in reserve accounts."

Savings Interest Rate

Mr. Bogart expressed regret that it had been found necessary to reduce to 1 1/4% per annum the rate of interest paid on savings deposits, saying the decision had been made with reluctance, and it was only the continued decline in the yield on securities and the low level of commercial loans that had compelled the banks to take the step.

Home Loan Plan

Ontario Leads The Provinces In Number And Amount Of Loans

Ontario led the provinces in number and amount of loans made up to Nov. 15 under the government home improvement plan, according to official figures issued.

Branches of banks in Ontario reported 335 loans amounting to \$123,702 out of the total for Canada of \$84,400 loans amounting to \$39,453. Quebec came second with 181 loans totalling \$81,347 and British Columbia third with 107 loans and a total of \$3,207.

Figures for other western provinces follow: Alberta, 52 loans, \$20,815; Manitoba, 31 loans, \$12,388; Saskatchewan, 21 loans, \$7,251.
